PROFIL

Currently in training, I'm building strong skills in network security, system protection, Cisco technologies and I am a IA enthusiast. I aim to become a cybersecurity expert, designing secure and resilient systems to protect digital infrastructures. My long-term goal is to specialize in cybersecurity, I also aspire to grow as a full-stack developer to better understand the full spectrum of software development. By engaging in hands-on projects and internships, I seek to strengthen my technical foundation and gain practical experience across both fields. I'm curious, detail-oriented, and always eager to learn something new.
